Solo-built a production SaaS for AI voice agents — from blank repo to paying customers. I build complete platforms, not features. Everything from SIP telephony to Kubernetes, brand design to real-time WebSocket bridges. Currently running 5 active roles across voice AI, DevOps, and enterprise consulting.

Focus	Status	Location	Available
Voice AI · Full-Stack	Founder & Solo Engineer	Ingolstadt, DE	Open to opportunities

TECHNICAL SKILLS

Core	TypeScript	Python	Svelte/SvelteKit	HTML/CSS		
Real-Time	LiveKit	WebRTC	SIP	WebSockets	STT/TTS	LLM Orchestration
Infra	Docker	Kubernetes	Ansible	Hetzner	Linux	CI/CD
Data	PostgreSQL	pgvector	Redis	Drizzle ORM	RAG	
Auth	OAuth2/OIDC	SSO (Logto)	RBAC	Multi-Tenant	ZVT POS	

EXPERIENCE

AICOYO Founder & Solo Engineer

Ingolstadt

Apr 2024 – Present

Production-grade SaaS for AI voice agents. Solo-built from scratch. 2 paying customers. 80%+ margin. 100% uptime.

Real-Time Voice Pipeline
End-to-end STT → LLM → TTS with sub-500ms latency. LiveKit, WebRTC, SIP telephony.

Visual Flow Builder
15+ node types — drag-and-drop for operators, full programmatic control for engineers.

Multi-Tenant Platform
RBAC, live call monitoring, warm transfer (AI ↔ human), vector memory via pgvector.

Infrastructure & Deployment
Docker/K8s with on-prem deployment. Production-ready from bare metal in minutes.

#mitdenkt Full-Stack / DevOps

Ingolstadt

Sep 2024 – Feb 2026

Payment Integration
ZVT terminal — custom WebSocket bridge between field POS and Bun/Fastify backend.

Full DevOps Ownership
Docker, Ansible playbooks, K8s on Hetzner, GitHub Actions CI/CD.

SSO & Admin Console
Logto SSO infrastructure, admin dashboard, telephony boxes, AI calling agents.

Backend Services
FastAPI + Bun microservices, PostgreSQL, real-time data pipelines.

HIVE Systems Software Engineer

Nuremberg

Oct 2022 – Mar 2024

Enterprise drone fleet management. DAL-B safety-critical software under DO-178C aviation standard.

3D GIS & Fleet Dashboard
Frontend lead — ArcGIS 3D mapping, real-time telemetry, mission planning, geofence enforcement.

Video & Encryption
H.264 NAL/AU parsing for encrypted drone feeds. YubiKey-based HSM integration for fleet security.

DAL-B Regulated Software
DO-178C certified avionics. Co-designed UX with compliance teams. SvelteKit, TypeScript.

MORE EXPERIENCE

GRIT Racing · Ops Engineer

Remote · Oct 2024 – Present

- Race control platform: telemetry overlays, schedule tracking, live pit crew data sync.
- LiveKit AI copilots for team briefings and race strategy. 50/50 revenue-share partnership.

NNFlow · Co-Founder

Ingolstadt · Jan 2025 – Present

- IT consulting agency with Niklas Röthlingshöfer. Enterprise process optimization and automation.
- Client: Canzler & Bergmeier (patent law) — automated patent figure generation, Patent-Lektor.

EDUCATION & BACKGROUND

TH Ingolstadt

B.Sc. User Experience Design

Oct 2023 – Jul 2026 (exp.)

HCI, prototyping, user research.
Combining design thinking with engineering.

Certifications

EU A1/A3 Drone License

DO-178C (DAL-B)

Safety-critical avionics software development at HIVE Systems.

WHAT I BRING

Zero → Production

Complete products solo. Not features — platforms. AICOYO went from blank repo to paying customers in months.

Real-Time Systems

Voice pipelines, telemetry feeds, WebSocket bridges, SIP integrations. Milliseconds matter, downtime isn't an option.

Full Ownership

Frontend to Kubernetes. Brand design to SIP telephony. Payment terminals to AI orchestration. I ship, not hand off.

BEYOND WORK

Drones & FPV

Piano

Art & Sketching

Boxing

Sim Racing

Open Source

Home Lab

Linux & Shell

Japanese

Adventures

Let's talk.

I'm looking for roles where I can build real products end-to-end — not sit in meetings about features I could have shipped by lunch.

If you need someone who owns the full stack and actually delivers, let's connect.
